DETAILED ACTION

Allowable Subject Matter

Claims 1-25 are allowed.

Reasons For Allowance

The following is a statement of reasons for the indication of allowable subject matter: The prior art taken alone or in combination neither discloses nor makes obvious the instant process of claims as a whole. Specifically, the prior art of record, Noguchi (U.S. Patent 6,461,901) discloses a process for forming at least one transistor on a substrate 100, the process comprises depositing on the substrate at least one layer of semiconductor material 104 wherein the substrate is made of a quartz glass but fails to teach or suggest the Applicant's steps of a process for forming at least one transistor on a substrate, which process comprises depositing on the substrate at least one layer of semiconductor material, wherein the substrate comprises a polyphenylene polyimide as recited in the currently amended independent claim 1, lines 1-3. The secondary reference Derwent Abstract (JP 63084089) teaches a substrate comprising a layer of polyphenylene polyimide similar to the preferred substrate used in the present invention. However, the Abstract only teach that this substrate is useful as a substrate for formation of flexible printed circuits and does not teach that this substrate is useful for the formation of film transistors thereon.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably
